

SALESFORCE DEVELOPERFOOD CONNECT

TO SUPPLY LEFT OVER FOOD TO POOR

Name : MOLLI SAI VAMSI

College: Gayatri Vidya Parishad College of Engineering (A), Visakhapatnam

Roll Number: 21131A05C4

Email: 21131a05c4@gvpce.ac.in

Overview

FoodConnect is a Salesforce-driven application designed to reduce food waste and support hunger relief efforts. By connecting food donors—such as restaurants, grocery stores, and suppliers—with non-profits and shelters, FoodConnect facilitates efficient surplus food redistribution to communities in need. The platform leverages automation and real-time tracking to optimize logistics and ensure transparency in the donation process.

Objectives

1. **Reduce Food Waste:** Significantly decrease the amount of surplus food discarded by restaurants, grocery stores, and food suppliers by redirecting it to communities in need.
 2. **Enhance Social Impact:** Support hunger relief efforts by creating an efficient distribution network that connects food donors with recipient organizations.
 3. **Increase Operational Efficiency:** Use Salesforce to streamline and automate food donation logistics, ensuring timely and accurate distribution.
 4. **Promote Transparency and Accountability:** Provide visibility into the food donation process for stakeholders, from donation registration to delivery.
-

Specific Outcomes

1. **Real-Time Tracking of Donations:** Implement a live dashboard to monitor food donations from initial registration to delivery confirmation.
 2. **Automated Matching System:** Establish a location-based matching algorithm that pairs donors with nearby shelters or non-profits based on food type and urgency.
 3. **Customizable Alerts and Notifications:** Send automated alerts to field agents and recipient organizations regarding new donations, pickup times, and delivery statuses.
 4. **Mobile-Enabled Delivery Management:** Equip field agents with mobile access for status updates and tracking deliveries, enhancing logistical precision and real-time reporting.
 5. **Comprehensive Donor and Recipient Management:** Use Salesforce CRM capabilities to maintain records of all donors and recipients, fostering a sustainable food redistribution network.
-

Salesforce Key Features and Concepts Utilized

What is Salesforce?

Salesforce is a leading cloud-based Customer Relationship Management (CRM) platform that supports businesses in managing sales, customer service, and marketing. It provides tools for automation, analytics, and customer engagement, along with extensive customization through its AppExchange marketplace and a wide range of integration options. Salesforce's scalability and flexibility make it suitable for companies of all sizes and industries.

Salesforce Concepts Applied

1. Custom and Standard Objects

- **Custom Objects:** Created for entities like Donors, Drop-Off Points, Volunteers, and Venues to organize data essential for managing food donations, tracking drop-off points, and coordinating volunteers.
- **Standard Objects:** Leveraged Accounts and Contacts to manage relationships with donors and recipient organizations, ensuring data consistency and accessibility.

2. Fields and Data Management

- **Custom Fields:** Added to track specifics, such as food category, donation quantity, task ID, volunteer availability, and location details for easy access and organization.
- **Data Tracking:** Ensures efficient logging and retrieval of information, supporting real-time updates and streamlined reporting.

3. Flows

- Automated workflows (Flows) guide users through processes like registering new donations, alerting volunteers, and scheduling tasks, reducing manual effort and enhancing efficiency.

4. Triggers

- **Apex Triggers:** Automate actions on record changes, such as updating inventory counts and notifying field agents, which improves response times and data accuracy.

5. Profiles and Permissions

- Defined profiles and user roles to control access levels, ensuring data privacy and security, and allowing users to interact only with relevant data.

6. Public Groups and Sharing Rules

- **Public Groups and Sharing Rules:** Facilitate collaborative access among users, with groups like volunteer networks and donor partners established for streamlined coordination.

7. Reports and Dashboards

- **Custom Reports and Dashboards:** Provide visual insights into donation status, volunteer activity, and delivery metrics, with real-time analytics for project monitoring and impact evaluation.

8. Mobile Integration

- Mobile device compatibility allows field agents to access and update data remotely, improving logistics management and real-time updates.

9. Lightning App and Custom Tabs

- Custom Lightning App and tabs for easy navigation between key objects, such as Donation Status, Task Tracking, and Volunteer Management, providing a user-friendly experience.

10. Dashboards for Key Performance Indicators (KPIs)

- Dashboards display critical metrics on food distribution, volunteer engagement, and donor contributions, giving stakeholders an overview of project performance and impact.
-

Creating a Salesforce Developer Account

Instructions

- **Go to the following website:**<https://developer.salesforce.com/signup>.
- **Fill out the sign-up form** with the information below.

Required Information

Field	Description
First Name & Last Name	Your full name
Email	Your email address
Role	Developer
Company	College or Company Name
Country	India
Postal Code	Your postal code
Username	A combination of your name and company, in the format username@organization.com. This does not need to be a real email address.

Account Activation

- **Check your email** for a verification message.
- **Follow the link** in the email to activate your account.
- *Activation may take 5-10 minutes.*

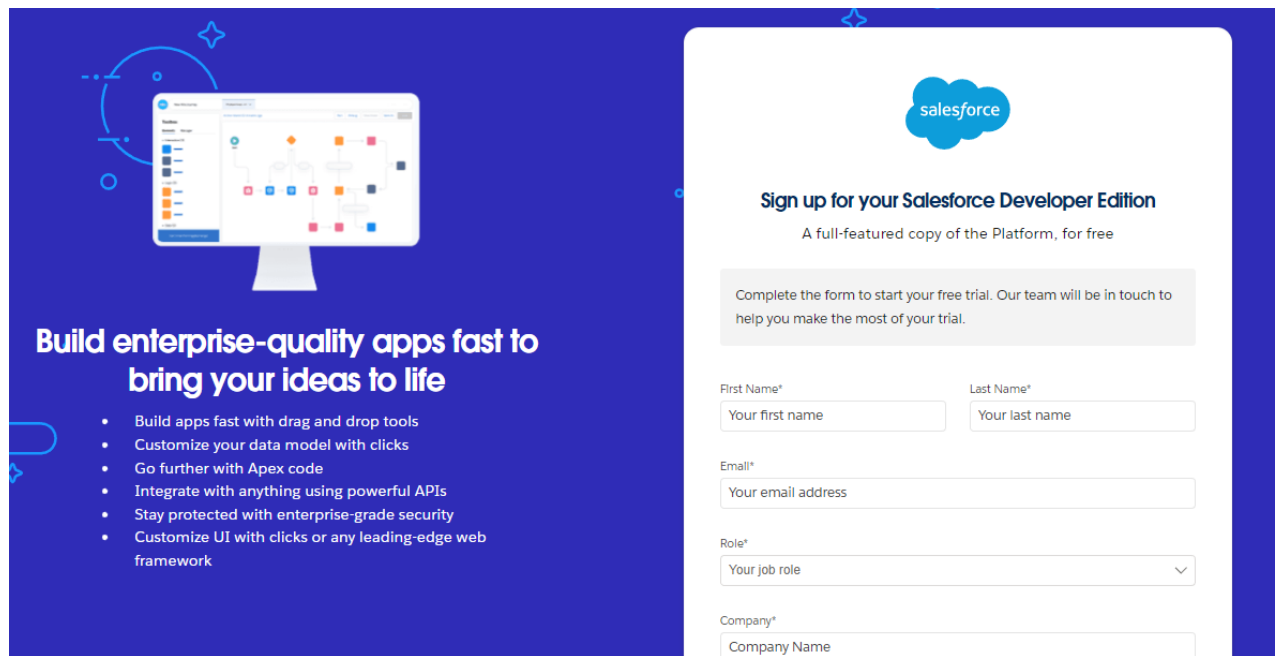

Salesforce Account Setup

Instructions

This document provides instructions for changing your Salesforce password.

Steps

- **Step 1:** Click on **Verify Account**.
- **Step 2:** Provide a new password meeting the following criteria:*At least 8 characters. At least 1 letter. At least 1 number.*
- **Step 3:** Answer the security question.
- **Step 4:** Click **Change Password**.
- **Result:** You will be redirected to your Salesforce setup page.

The image shows a promotional banner for Salesforce Developer Edition on the left and a sign-up form on the right. The banner features a computer monitor displaying a flowchart and the text 'Build enterprise-quality apps fast to bring your ideas to life'. Below this, a bulleted list highlights key features: building apps with drag-and-drop tools, customizing data models, using Apex code, integrating with APIs, enterprise-grade security, and customizing the UI. The sign-up form on the right is titled 'Sign up for your Salesforce Developer Edition' and includes a sub-headline 'A full-featured copy of the Platform, for free'. It contains a message about completing the form to start a free trial, followed by input fields for First Name, Last Name, Email, Role (a dropdown menu), and Company.

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

Salesforce Setup Instructions

Navigating to Setup

- To reach the Setup page, click on **Setup** in the top navigation bar.

Creating an Object

- To create a new object: From the Setup page, click on **Object Manager**. Click on **Create**. Select **Custom Object**.

The screenshot shows the Salesforce Setup interface. At the top, there's a search bar and navigation tabs for Setup, Home, and Object Manager. The Object Manager tab is active. On the left, there's a sidebar with a search bar and a list of categories: Process Automation, Flows, Identity, and Login Flows. The main content area displays three featured cards: 'Get Started with Einstein Bots', 'Mobile Publisher', and 'Real-time Collaborative Docs'. Below these cards is a section titled 'Most Recently Used' with a table listing 10 items.

NAME	TYPE	OBJECT
HOME Page	Lightning Page	
Distance	Custom Field Definition	Drop-Off Point
State	Custom Field Definition	Drop-Off Point
distance calculation	Custom Field Definition	Drop-Off Point
Venue	Custom Field Definition	Drop-Off Point
Drop-Off Point	Custom Object Definition	
Location 2	Custom Field Definition	Drop-Off Point
Distance	Custom Field Definition	Task
Task	Custom Object Definition	
Date	Custom Field Definition	Task

Custom Object Definition

Defining the Object

- **Label Name:** Enter the singular label name.
- **Plural Label Name:** Enter the plural label name.
- **Features:** Click on **Allow reports** and **Allow search**.

Creating Custom Objects

Instructions for Creating "Venue" Object

- **Steps to create a Venue object:**Navigate to the setup page.Click on *Object Manager*.Click on *Create*.Click on *Custom Object*.Enter the label name as **Venue**.Enter the plural label name as **Venues**.Set the record name as **Venue Name**.Choose **Text** as the data type.Click on *Allow reports* and *Track Field History*, *Allow Activities*.Enable *Allow Search*.Click *Save*.

Instructions for Creating "Drop-Off Point" Object

- **Steps to create a Drop-Off Point object:**Navigate to the setup page.Click on *Object Manager*.Click on *Create*.Click on *Custom Object*.Enter the label name as **Drop-Off Point**.Enter the plural label name as **Drop-Off Points**.Specify the record name.Click *Save*.

Creating Objects in a System

This document outlines steps for creating different types of objects within a system.

Creating a Task Object

- **To create a task object:**Navigate to the *setup page* and select *Object Manager*.Click *Create* and choose *Custom Object*.Enter the label name as **Task**.Enter the plural label name as **Tasks**.Set the *Record Name* to **Task Name**.Set the *Data Type* to **Text**.Click *Allow reports*, *Track Field History*, and *Allow Activities*.Click *Save*.

Creating a Volunteer Object

- **To create a volunteer object:**Navigate to the *setup page* and select *Object Manager*.Click *Create* and choose *Custom Object*.Enter the label name as **Volunteer**.Enter the plural label name as **Volunteers**.Set the *Record Name* to **Volunteer Name**.Set the *Data Type* to **Text**.Click *Allow reports*, *Track Field History*, and *Allow Activities*.Click *Save*.

Creating an Execution Details Object

- **To create an execution details object:** *Instructions for creating this object are provided.*

Note: The document uses a format of instructions with step numbers and arrows (>>) to indicate navigation or actions. The document also references allowing reports, field history, and activities, which likely relate to system features.

10 items		
NAME	TYPE	OBJECT
HOME Page	Lightning Page	
Distance	Custom Field Definition	Drop-Off Point
State	Custom Field Definition	Drop-Off Point
distance calculation	Custom Field Definition	Drop-Off Point
Venue	Custom Field Definition	Drop-Off Point
Drop-Off Point	Custom Object Definition	
Location 2	Custom Field Definition	Drop-Off Point
Distance	Custom Field Definition	Task
Task	Custom Object Definition	
Date	Custom Field Definition	Task

Creating a Custom Tab

Steps

- **Select Object:** Choose the object (e.g., Venue).
- **Choose Tab Style:** Select the desired tab style.
- **Add to Profiles:** Add the tab to profiles. This is the default setting.
- **Add to Custom App:** Add the tab to a custom app.
- **Include Tab:** Remove the checkmark from the *include tab* option.
- **Personal Customizations:** Ensure the *Append tab to users' existing personal customizations* option is checked.
- **Save:** Click the Save button.

Creating a Tab

- **Find Tabs:** Go to the setup page and search for "Tabs" in the Quick Find bar.
- **Create New Tab:** Click on the "New" option, specifically under the "Custom object" tab.
- **Object Name:** Enter the label name for the tab.
- **Plural Label:** Enter the plural label.
- **Record Name/Format:** Enter the record name and format. (e.g., Execution Detail Name)
- **Data Type:** Set the data type (e.g., Text).
- **Permissions:** Click on *Allow reports* and *Track Field History*, and *Allow Activities*.
- **Search:** Allow search functionality.
- **Save:** Click the save button.

Creating Remaining Tabs

Instructions

- **Create tabs** for remaining objects (*Drop-Off Point, Task, Volunteer, Execution Details*).
- **Follow steps** from Activity 1.

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with "tabs" entered, showing results under "User Interface" including "Rename Tabs and Labels" and "Tabs". The main content area is titled "Custom Tabs" and includes a "Help for this Page" link. Below the title, there is a paragraph explaining that custom tabs can extend Salesforce functionality or build new application functionality. The page is divided into sections for different tab types: Custom Object Tabs, Web Tabs, Visualforce Tabs, Lightning Component Tabs, and Lightning Page Tabs. Each section has a "New" button and a "What Is This?" link. The Custom Object Tabs section contains a table with columns for Action, Label, Tab Style, and Description. The table lists five tabs: Drop-Off Points (Flag style), Execution Details (Pencil style), Tasks (CD/DVD style), Venues (Building style), and Volunteers (People style). Each row has "Edit" and "Del" links. The other sections (Web Tabs, Visualforce Tabs, Lightning Component Tabs, and Lightning Page Tabs) all show a message: "No [Tab Type] Tabs have been defined".

Action	Label	Tab Style	Description
Edit Del	Drop-Off Points	Flag	
Edit Del	Execution Details	Pencil	
Edit Del	Tasks	CD/DVD	
Edit Del	Venues	Building	
Edit Del	Volunteers	People	

Create a Lightning App

Instructions

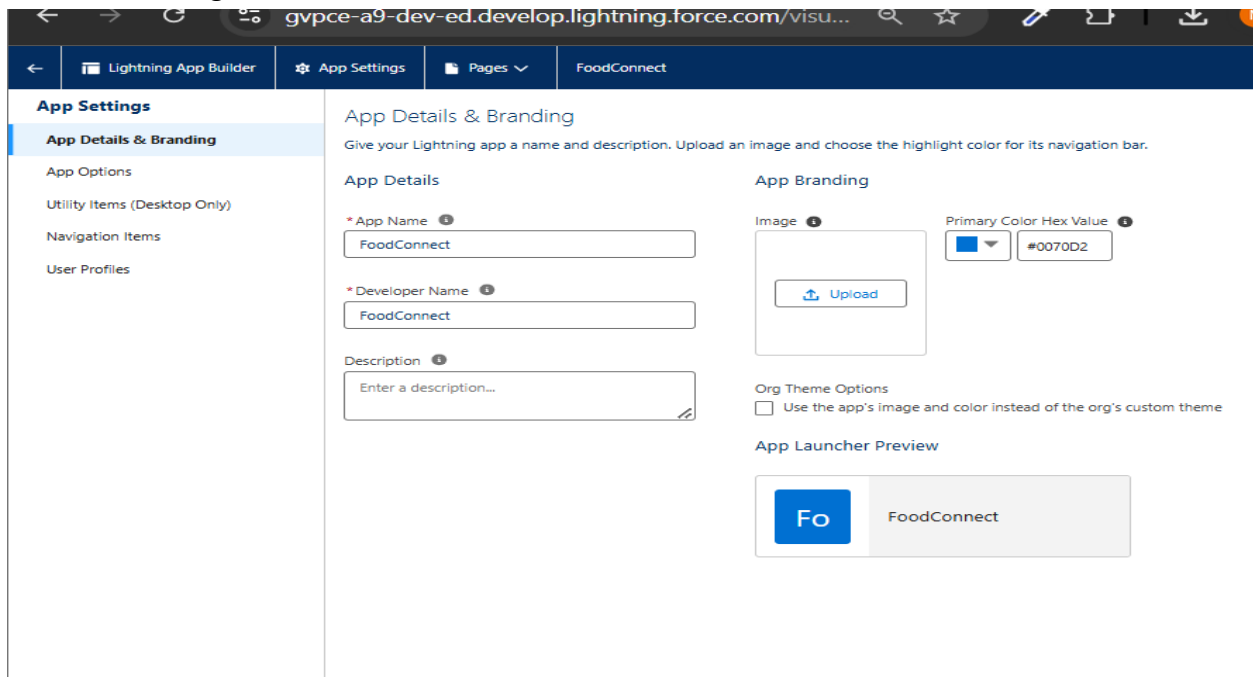

- Go to setup page.
- Search for *app manager* in quick find.
- Select app manager.
- Click on **New Lightning App**.

App Details and Branding

- **App Name:** *FoodConnect* (auto-populated).
- **Developer Name:** *Auto-populated*.
- **Image:** Optional. If desired, upload an image. Otherwise, keep the default.
- **Primary color:** Use a hexadecimal color code (keep default).

Final Step

- Click **Next**.
- Set **Navigation Style** to *Standard* in the app options page.
- Click **Next** again.

The screenshot displays the 'App Settings' page in the Lightning App Builder. The left sidebar shows the 'App Settings' menu with 'App Details & Branding' selected. The main content area is titled 'App Details & Branding' and includes the instruction: 'Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.'

App Details

- * App Name: FoodConnect
- * Developer Name: FoodConnect
- Description: Enter a description...

App Branding

- Image: Upload button
- Primary Color Hex Value: #0070D2
- Org Theme Options: ☐ Use the app's image and color instead of the org's custom theme

App Launcher Preview

The preview shows a blue square icon with the letters 'Fo' and a grey rectangular button labeled 'FoodConnect'.

New Lightning App Setup

App Options

- Keep *default* navigation and form factors.
- Choose *setup* and *personalization* options.

Navigation Items

- **Available Items:** A list of items that can be added to the navigation.
- **Selected Items:** A list of items currently selected for navigation. Items include Home, Venues, Tasks, Drop-Off Points, Execution Details, Volunteers, Reports, and Dashboards.
- Use the search bar and arrow buttons to add or remove items.

Next Steps

- Move to the next step to add user profiles.

The screenshot displays the Lightning App Builder interface for configuring navigation items. The top navigation bar includes a back arrow, 'Lightning App Builder', 'App Settings', 'Pages', 'FoodConnect', and a 'Help' link. The left sidebar shows the 'App Settings' menu with options: 'App Details & Branding', 'App Options', 'Utility Items (Desktop Only)', 'Navigation Items' (highlighted), and 'User Profiles'.

The main content area is titled 'Navigation Items' and contains the following text: 'Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.'

The interface is divided into two main sections:

- Available Items:** A list of items that can be added to the navigation. It includes a search bar with the placeholder 'Type to filter list...'. The list contains the following items: Accounts, All Sites, Alternative Payment Methods, Analytics, App Launcher, Appointment Categories, Appointment Invitations, Approval Requests, Asset Action Sources, Asset Actions, Asset State Periods, Assets, and Async Operation Logs.
- Selected Items:** A list of items currently selected for navigation. It includes the following items: Home, Venues, Tasks, Drop-Off Points, Execution Details, Volunteers, Reports, and Dashboards.

Arrows on the right side of the lists indicate that items can be moved between the two sections.

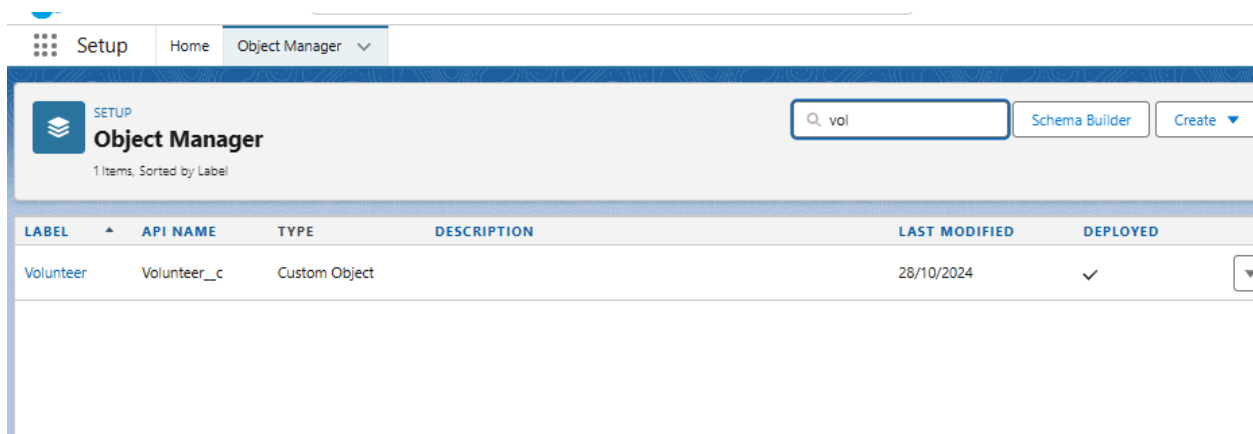

Creating Relationships in Salesforce

This document describes how to create relationships between objects in a Salesforce application.

Setting up a Lookup Relationship

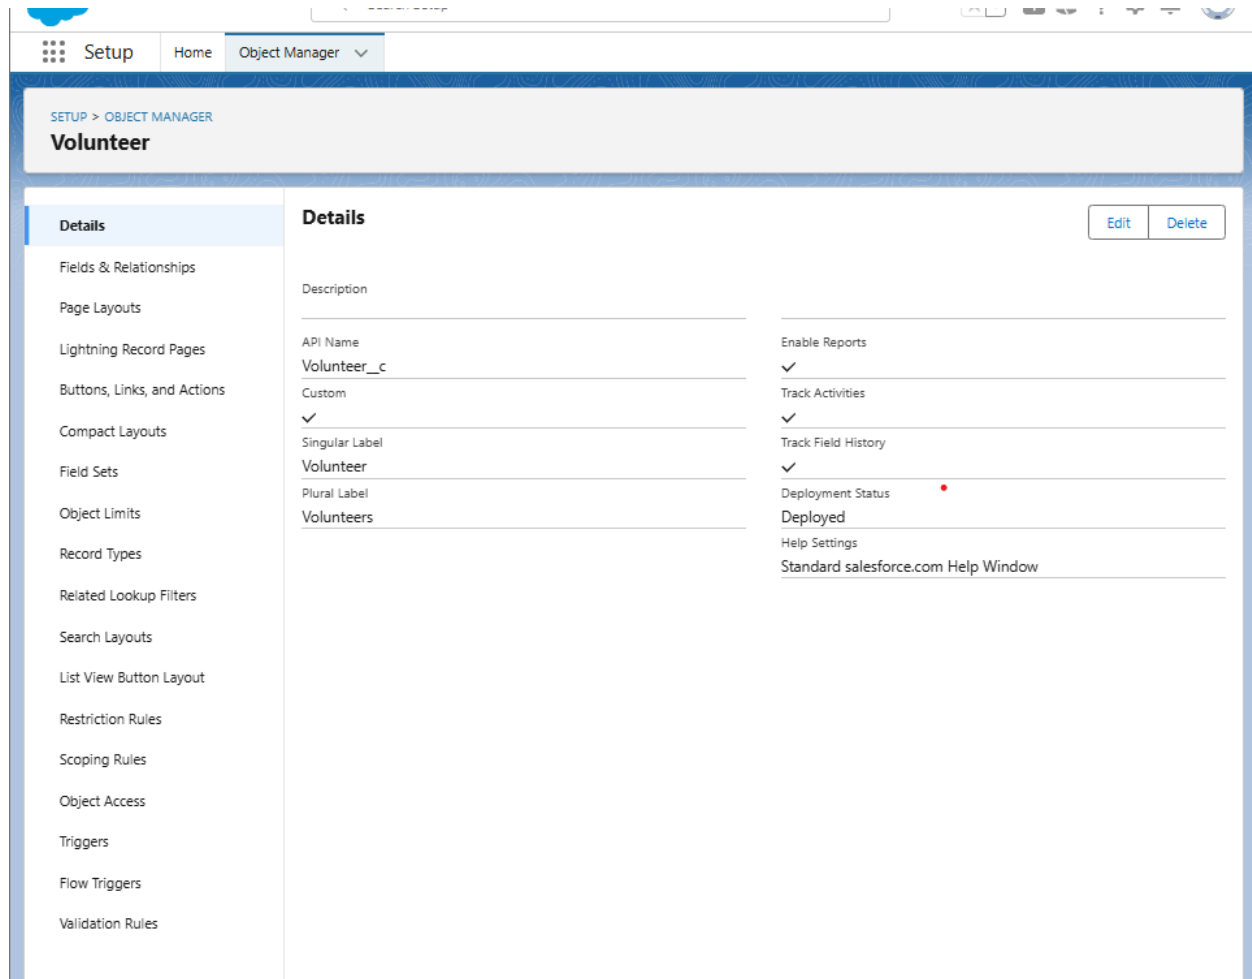

- **Step 1:** Navigate to *Setup > Object Manager*.
- **Step 2:** Search for the *Volunteer* object.
- **Step 3:** Click on *Fields & Relationships > New*.
- **Step 4:** Select *Master Detail* relationship.
- **Step 5:** Choose the related object ("*Drop-Off point*").

Note: This process creates a relationship between a Volunteer object and a Drop-Off point object.

The screenshot shows the Salesforce Object Manager interface. At the top, there are navigation tabs: 'Setup', 'Home', and 'Object Manager'. Below the tabs, the 'Object Manager' section is active, displaying a search bar with 'vol' entered, a 'Schema Builder' button, and a 'Create' button. Below this, a table lists the objects. The table has columns: LABEL, API NAME, TYPE, DESCRIPTION, LAST MODIFIED, and DEPLOYED. The table contains one row for the 'Volunteer' object, which is a 'Custom Object' last modified on '28/10/2024' and is 'DEPLOYED' (indicated by a checkmark).

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Volunteer	Volunteer__c	Custom Object		28/10/2024	✓

Setting Up Relationships in a System

This document describes steps for creating relationships between objects in a system. The process involves adding fields that link different data entries.

Creating a "Drop-Off Point" Relationship

- **Field Name:***Drop_Off_point*
- **Field Label:***Auto generated*
- **Next Steps:***Next >> Next >> Save*

Creating a "Volunteer" Relationship

- **Steps:** Access the *Object Manager* and search for *Execution Details*. Navigate to *Fields & Relationships* > *New*. Select *Master Detail Relationship*. Choose *Volunteer* as the related object. **Field Name:** *Volunteer* **Field Label:** *Auto generated* **Next Steps:** *Next >> Next >> Save*

Creating a "Task" Relationship

- **Steps:** Access the *Object Manager* and search for *Execution Details*. Navigate to *Fields & Relationships* > *New*. Select *Master Detail Relationship*. Choose *Task* as the related object. **Field Name:** *Task* **Field Label:** *Auto generated* **Next Steps:** *Next >> Next >> Save*

Creating Lookup Relationships

Instructions for Creating Lookup Relationships

This document provides instructions for creating lookup relationships in a system, likely a CRM or similar application. It details steps for associating fields with other objects.

Step-by-Step Instructions

- *Open* **Object Manager**.
- *Find* the desired object.
- Navigate to **Fields & Relationships**.
- Select **New**.
- Choose **Lookup Relationship**.
- Select the **related object**.
- Enter the **field name** and **label**.
- Click **Next** twice and then **Save**.

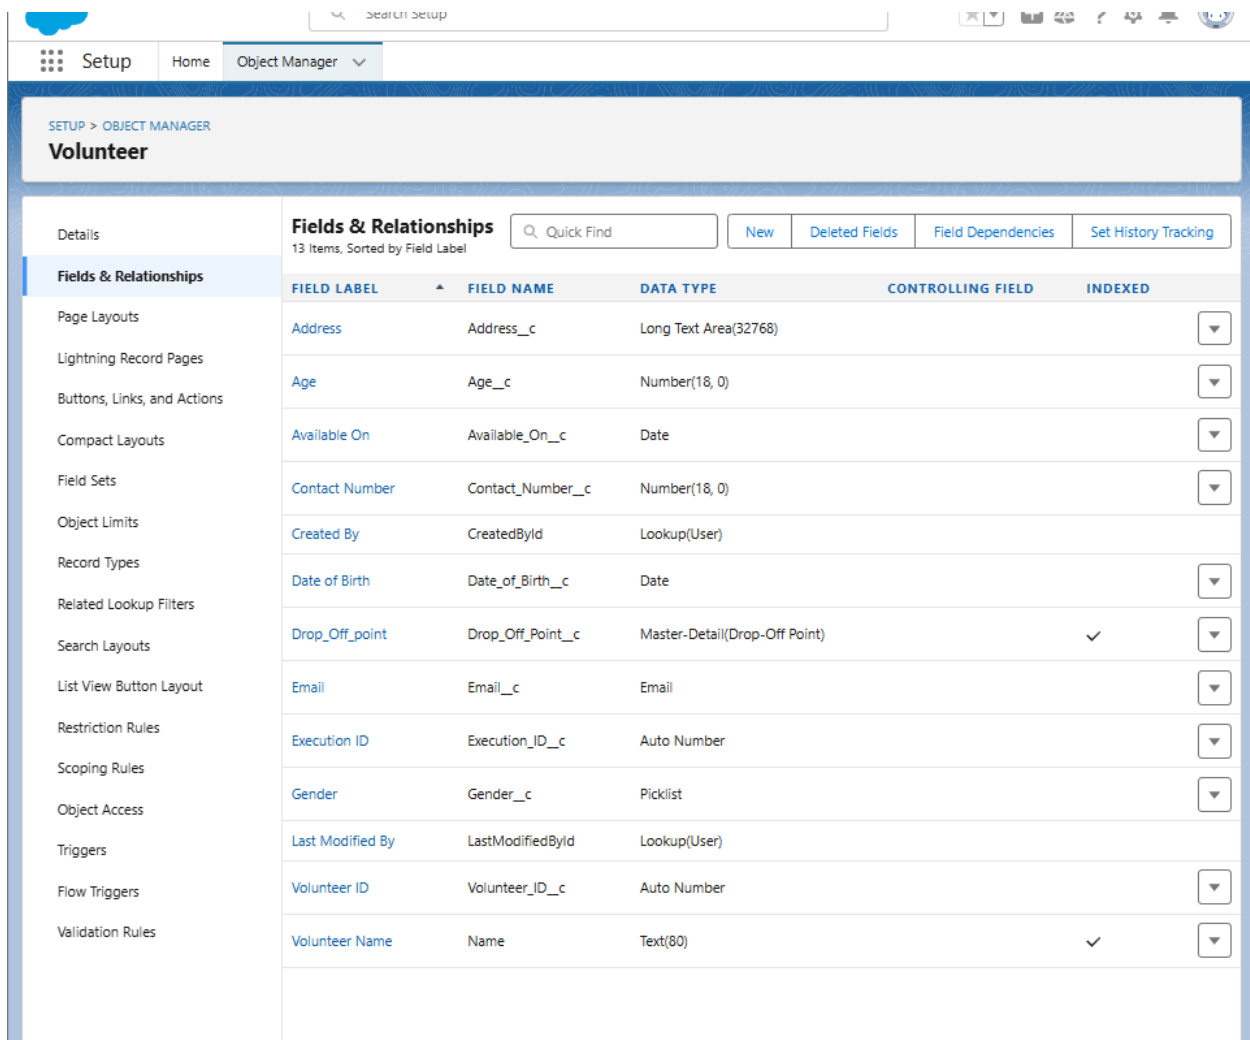

Specific Examples (Venue Object)

- **Related Object:** *Drop-Off Point*
- **Field Name:** *Venue*
- **Field Label:** *Venue_c*
- **Related Object:** *Venue*
- **Field Name:** *Sponsored By*
- **Field Label:** *Auto generated*
- **Related Object:** *Drop-Off point*

- **Field Name:**Drop-Off point
- **Field Label:**Auto generated

Adding Fields to an Object

This document provides instructions for adding fields to an object, likely in a database or software application.

The screenshot shows the Salesforce Object Manager interface for the 'Volunteer' object. The 'Fields & Relationships' tab is active, displaying a list of 13 fields. The fields are sorted by Field Label. The table includes columns for Field Label, Field Name, Data Type, Controlling Field, and Indexed status.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Address	Address__c	Long Text Area(32768)		
Age	Age__c	Number(18, 0)		
Available On	Available_On__c	Date		
Contact Number	Contact_Number__c	Number(18, 0)		
Created By	CreatedById	Lookup(User)

Execution ID	Execution_ID__c	Auto Number		
Gender	Gender__c	Picklist		
Last Modified By	LastModifiedById	Lookup(User)		
Volunteer ID	Volunteer_ID__c	Auto Number		
Volunteer Name	Name	Text(80)		✓

Adding an Email Field

- **Step 1:** Navigate to **Object Manager**.
- **Step 2:** Search for the object (e.g., "Venue").
- **Step 3:** Click on **Fields & Relationships** -> **New**.

- **Step 4:** Select **Data Type** as "Email".
- **Step 5:** Enter the following:**Field Label:***Contact Email***Field Name:***Contact Email*
- **Step 6:** Check the required box.
- **Step 7:** Click **Next** twice, then **Save and new**.

Adding a Phone Field

- **Step 1:** Navigate to **Object Manager**.
- **Step 2:** Search for the object (e.g., "Venue").
- **Step 3:** Click on **Fields & Relationships** -> **New**.
- **Step 4:** Select **Data Type** as "Phone".
- **Step 5:** Enter the following:**Field Label:***Contact Phone***Field Name:***Contact Phone*
- **Step 6:** Check the required box.
- **Step 7:** Click **Next** twice, then **Save and new**.

Adding a Geolocation Field

- **Step 1:** Navigate to **Object Manager**.
- **Step 2:** Search for the object (e.g., "Venue").
- **Step 3:** Click on **Fields & Relationships** -> **New**.
- **Step 4:** Select **Data Type** as "Geolocation".
- **Step 5:** Enter the following:**Field Label:***Location***Decimal Places:***4***Field Name:***Location***Description:***Enter the Geolocation of your Venue*

Step 6: Click **Next** twice, then **Save and new**.

Creating Fields in Objects

Venue Object

- To create a new field:Go to *Object Manager*.Type *Venue* in the search bar.Click on the object.Click on *Fields & Relationships*.Click *New*.Select *Long Text Area* as the data type.Fill in the following:**Field Label:** Venue Location**Field Name:** Venue_LocationClick *Next >> Next >> Save and new*.

Drop-Off Point Object

- To create a new field:Go to *Object Manager*.Type *Drop-Off point* in the search bar.Click on the object.Click on *Fields & Relationships*.Click *New*.Select *Geolocation* as the data type.Fill in the following:**Field Label:** Location 2**Field Name:** *gets auto generated***Description:** Enter the Geolocation of the Drop off Point**Geolocation Options:** select Decimal**Decimal Places:** 4Click *Next >> Next >> Save and new*.

Creating Fields in a Document

Creating a Formula Field

- **Data Type:***Formula*
- **Label:***distance calculation*
- **Name:***distance_calculation*
- **Return Type:***Number*
- **Formula:***DISTANCE(Location_2_c, Venue_r.Location_c, 'km')*
- **Action:***Click Next >> Next >> Save and new*.

Creating a Picklist Field

- **Data Type:***Picklist*
- **Label:***State*
- **Name:***State*
- **Values:***Enter values, with each value separated by a new line:Andhra Pradesh*

Creating Additional Fields

- **Navigate:***Go to setup >> click on Object Manager >> type object name (Drop-Off point) in search bar >> click on the object.*
- **Create New Field:***Now click on "Fields & Relationships" >> New*

Creating Fields in an Object

Creating a "Distance" Field

- **Steps:**Go to *setup*, click *Object Manager*, type *object name* (e.g., Task) in search bar, and click on the objectClick on *Fields & Relationships >> NewSelect Data type as Number* and click *NextFill the following:Field Label: DistanceField Name: DistanceLength: 14Decimal Places: 4Check the required check boxClick Next >> Next >> Save and new*

Creating a "Task ID" Field

- **Steps:**Go to *setup*, click *Object Manager*, type *object name* (e.g., Task) in search bar, and click on the objectClick on *Fields & Relationships >> NewSelect Data type as Auto Number* and click *NextFill the following:Field Label: Task IDDisplay Format: TASK-{0}Starting Number:*

1 **Field Name:** automatically generated
Check the *required* check box
Click *Next >> Next >>*
Save and new

The screenshot shows the Salesforce Setup interface. At the top, there are tabs for 'Setup', 'Home', and 'Object Manager'. Below the tabs, the breadcrumb 'SETUP > OBJECT MANAGER' is visible. The main heading is 'Task'. On the left, a sidebar lists various configuration options: Details (selected), Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules, Scoping Rules, Object Access, and Triggers. The 'Details' section is expanded, showing a table of configuration options. The table has two columns: the first column lists the configuration item, and the second column shows its current value or status. The items are: Description (empty), API Name (Task__c), Custom (checked), Singular Label (Task), Plural Label (Tasks), Enable Reports (checked), Track Activities (checked), Track Field History (checked), Deployment Status (Deployed), Help Settings (empty), and Standard salesforce.com Help Window (empty). An 'Edit' button is located in the top right corner of the 'Details' section.

Adding Fields to an Object

This document provides instructions for adding fields to an object, likely in a software application.

Adding a Date Field

- **Step 1:** Go to *Setup* and open *Object Manager*.
- **Step 2:** Search for the object type (e.g., "Task").
- **Step 3:** Open *Fields & Relationships* and select *New*.
- **Step 4:** Choose *Date* as the data type and click *Next*.
- **Step 5:** Fill in the following: *Field Label:* **Date** *Field Name:* **Date** Check the *required* box.
- **Step 6:** Click *Next* twice, then *Save and new*.

Adding a Multi-Select Picklist Field

- **Step 1:** Go to *Setup* and open *Object Manager*.
- **Step 2:** Search for the object type (e.g., "Task").
- **Step 3:** Open *Fields & Relationships* and select *New*.
- **Step 4:** Choose *Picklist (Multi-Select)* as the data type and click *Next*.
- **Step 5:** Fill in the following:
Field Label: **Food Category**
Field Name: **Food Category**
Enter the values for the picklist (Veg, Non-Veg, Salad, Snack), each on a new line.
- **Step 6:** Check the *required* box.
- **Step 7:** Click *Next* twice, then *Save and new*.

Adding Fields to Objects

This document provides instructions for adding fields to different objects.

Adding a "Rating" Field

- **Object:***Task*
- **Steps:**Go to *Setup* and open *Object Manager*.Search for the *Task* object.Click on *Fields & Relationships* -> *New*.Select *Data Type* as *Pick List*.Click *Next*.Fill in *Field Label* as *Rating*.Fill in *Field Name* as *Rating*.Enter values for the *Rating* field, each on a new line (e.g., 1, 2, 3, 4, 5).Click *Next* -> *Next* -> *Save and new*.

Adding a "Feedback" Field

- **Object:***Task*
- **Steps:**Go to *Setup* and open *Object Manager*.Search for the *Task* object.Click on *Fields & Relationships* -> *New*.Select *Data Type* as *Long Text Area*.Click *Next*.Fill in *Field Label* as *Feedback*.Fill in *Field Name* as *Feedback*.Click *Next* -> *Next* -> *Save and new*.

Adding a "Auto Number" Field

- **Object:***Volunteer*
- **Steps:**Go to *Setup* and open *Object Manager*.Search for the *Volunteer* object.Click on *Fields & Relationships* -> *New*.Select *Data Type* as *Auto Number*.Click *Next*.Fill in the required fields.Click *Next* -> *Next* -> *Save and new*.

Adding Fields to an Object

This document provides instructions for adding fields to an object, likely within a database or software application.

Steps for Adding a Field

- **Find the Object:** Navigate to the *Object Manager* and search for the desired object (e.g., "Volunteer").
- **Access Field Creation:** Click on the "Fields & Relationships" section and select "New."
- **Choose Data Type:** Select the appropriate data type (e.g., "Number," "Email").

- **Add Field Details:** Fill in the required information, including:
Field Label: A descriptive name for the field (e.g., "Age").
Field Name: The internal name for the field (e.g., "Age").
Required Check Box: Ensure the field is required.
- **Save Changes:** Click "Next" twice and then "Save" to finalize the field addition.

The instructions repeat these steps for adding fields with different data types (Age, Email, and Contact Number).

Creating Fields in an Object

Contact Number Field

- **Field Name:** *Contact Number*
- Click on the *required check box*
- Click *Next >> Next >> Save and new.*

Address Field

- **Steps to create:** Go to *setup*, click *Object Manager*, type *Volunteer* in search bar, then click on the object. Click on *Fields & Relationships >> New* Select *Data type as Text Area (Long)* and click *Next* Fill the *label* and *name as Address* Click *Next >> Next >> Save and new.*

Date of Birth Field

- **Steps to create:** Go to *setup*, click *Object Manager*, type *Volunteer* in search bar, then click on the object. Click on *Fields & Relationships >> New* Select *Data type as Date* and click *Next* Fill the *label* and *name as Date of Birth* Click *Next >> Next >> Save and new.*

Execution ID Field

- **Steps to create:** Go to *setup*, click *Object Manager*, type *Volunteer* in search bar, then click on the object. Click on *Fields & Relationships >> New* Select *Data type as Auto Number* and click *Next* Fill in *label as Execution ID.*

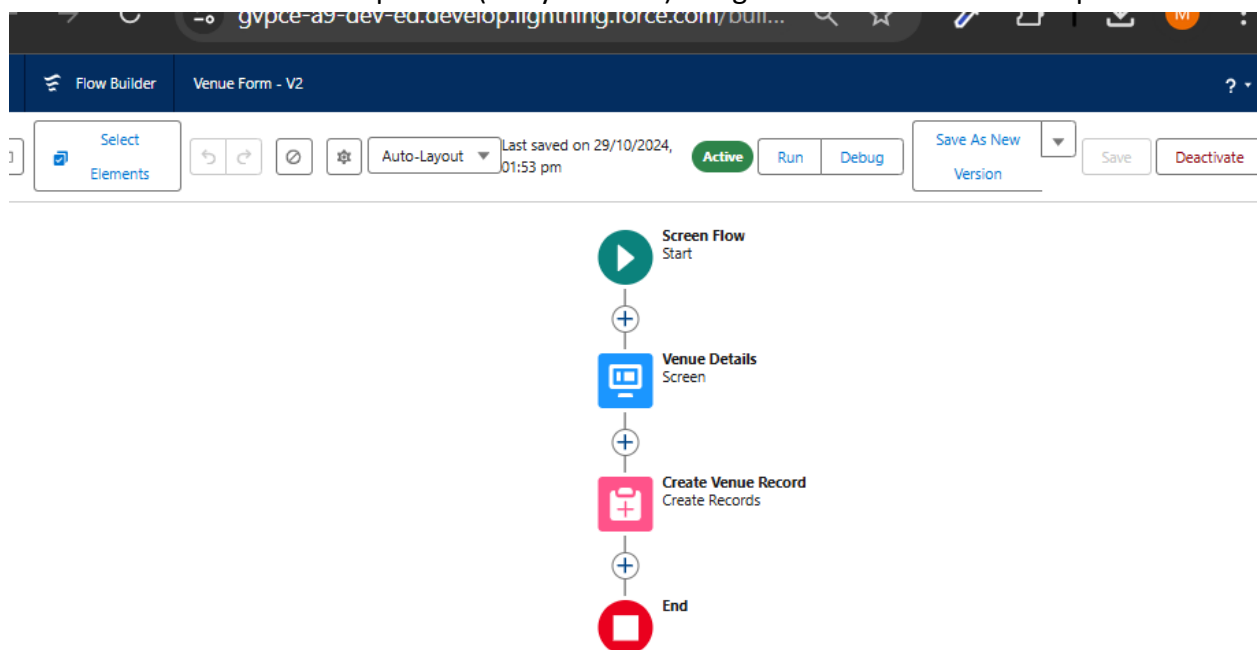

Creating a Flow for Venue Records

Initial Setup

- **Field Name:** Automatically generated.
- **Required Check Box:** Click to select.
- **Next Steps:** Click "Next" and "Save," then "New."
- **Flow Creation:** Navigate to Setup. Search for "Flow." Select "New Flow." Choose "Screen Flow." Click "Create."

Adding Components

- **Screen Element Modification:** Add elements using the "+" icon.
- **Screen Properties:** Configure screen properties (e.g., label).
- **Component Addition:** Add text components for *Venue Name, Email, Phone, Venue Location*. Add a number component (likely for data). Assign API names to each component.

Venue Creation Instructions

Step-by-Step Guide

- **Step 10:** Name the latitude component.
- **Step 11:** Name the longitude component and click "Done."
- **Step 12:** Click the "+" symbol between the venue details and the end. Click on the "create record" element.
- **Step 13:** Rename this new element as "Create Venue Record."
- **Step 13 (Continued):**Create one venue record.**Set Venue Record Fields:** Use separate resources and literal values.**Object:** Venue**Set Field Values:** Click "Add Field" five times to populate the required fields. Each field will be populated with a specific value.

Field Value Settings

Field	Value
Contact Email	{!Contact_Email.value}
Contact Phone	{!Contact_Phone.value}
Name	{!Venue_Name}
Venue Location	{!location}
Latitude	{!latitude}
Longitude	{!longitude}

Note:{!...} likely represents a syntax for referencing specific values within a system.

Creating a Record and Trigger

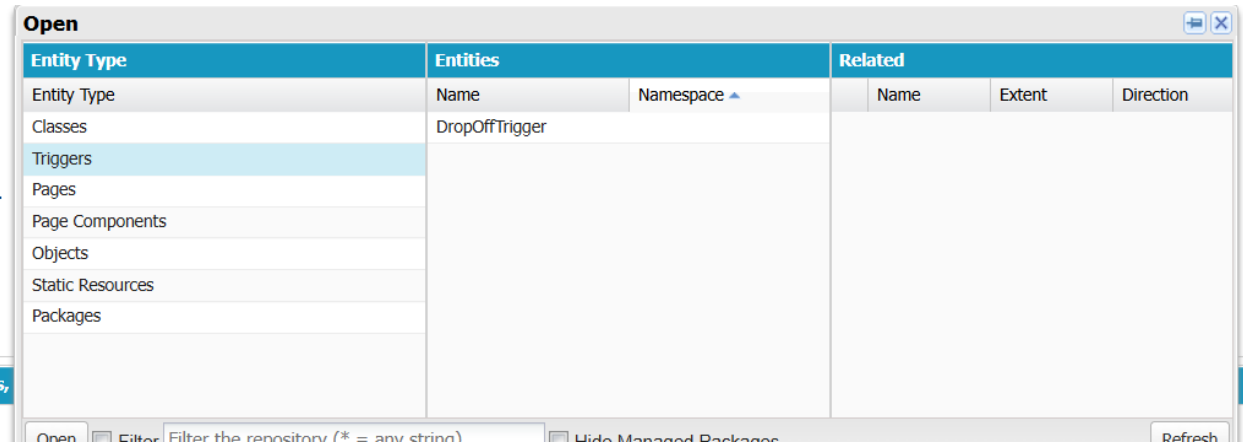

This document describes how to create a record and a trigger in a Salesforce-like system.

Creating a Record

- **Set field values:** The system allows setting values for fields like *Contact Email*, *Contact Phone*, *Name*, and *Venue Location*.
- **Click on Save:** Save the record with a specified *Flow Label* and *Flow API Name*.

Creating a Trigger

- **Access Developer Console:** Log in to the account and navigate to the developer console.
- **Create a Trigger:** Open the *File* menu in the toolbar. Select *New > Trigger*.
- **Configure Trigger:** Enter the *trigger name*. Specify the *object* to be triggered.

Keyboard Shortcuts

- A table of keyboard shortcuts is provided for common actions.

Action	Shortcut
Open	CTRL+O
Open Resource	CTRL+SHIFT+O
Open Lightning Resources	CTRL+SHIFT+A

New Apex Trigger Configuration

Trigger Creation

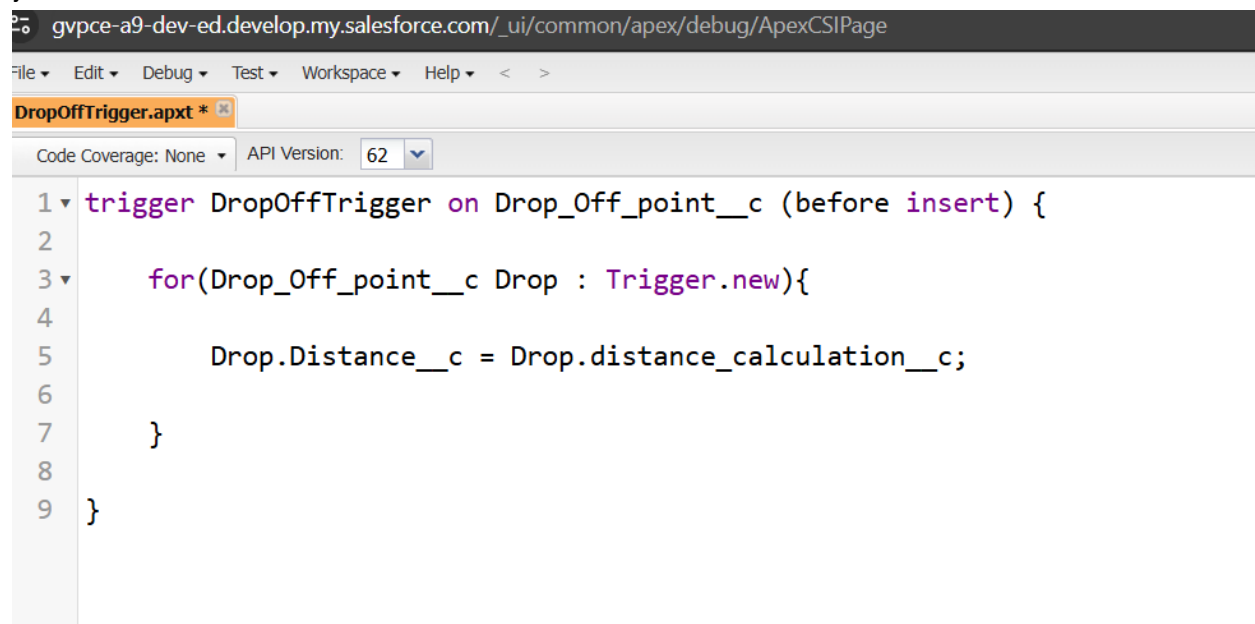

- **Name:** *DropOffTrigger*
- **Object:** *Drop-Off Point*
- **Action:** *Click on Submit*

Trigger Code Description

- **Purpose:** This trigger assigns the *Distance* field value from the *Distance Calculation* field. This is for use in sharing rules.

Trigger Code

```
trigger DropOffTrigger on Drop_Off_point_c (before insert) {  
for(Drop_Off_point_c Drop: Trigger.new){  
Drop.Distance_c = Drop.distance_calculation_c;  
}  
}
```

A screenshot of the Salesforce IDE interface. The browser address bar shows 'gvpce-a9-dev-ed.develop.my.salesforce.com/_ui/common/apex/debug/ApexCSIPage'. The IDE menu bar includes File, Edit, Debug, Test, Workspace, and Help. A tab titled 'DropOffTrigger.apxt' is open. Below the menu bar, there are controls for 'Code Coverage: None' and 'API Version: 62'. The main editor area displays the following Apex code:

```
1 trigger DropOffTrigger on Drop_Off_point__c (before insert) {  
2  
3     for(Drop_Off_point__c Drop : Trigger.new){  
4  
5         Drop.Distance__c = Drop.distance_calculation__c;  
6  
7     }  
8  
9 }
```

Profile Creation

- **Objective:** Create a new profile.
- **Steps:** Go to setup page. Type *Profiles* in Quick Find. Click on *Profiles*. Click on *Clone* beside *Standard Platform User*. Select *NGOs Profile* as the new profile name. Click *Save*.

User Creation Instructions

Creating User 1

- **Steps:** Go to the setup page, search for "users", click "New user".
- **General Information:** Fill in details like First Name, Last Name, Alias, Email, Username, and select the *User License* and *Profile*.
- **Username:** The *username* should be different from the *email*.
- **Example:** First Name: *Iksha Foundation*, Last Name: *Iksha_Foundation*, Alias: *iiksh*, Email: *ikshafoundation@sb.com*, *User License*: Salesforce Platform, *Profile*: NGOs Profile.
- **Active:** Check the "Active" box.

Saving the User

- Click "Save" button.

Creating Users 2 and 3

- **Steps:** Create two more users using the same steps as for User 1.
- **Differences:** Use different first and last names for each user, reflecting different NGOs.
- **Example:** Using different NGO names will create different user entries.

Field	User 2 (Example)	User 3 (Example)
First Name	NSS	Street Cause
Last Name	NSS	Street Cause
Username	nss@sb.com	streetcause@sb.com
Profile	NGOs Profile	NGOs Profile

Note: This document provides instructions for creating users with specific details and profiles. The different NGO names are used to create different user entries.

Creating Public Groups and Report Types

This document provides instructions for creating public groups and custom report types.

Creating Public Groups

Public Group 1

- **Steps:** Navigate to the *setup page*, search for *Public Groups*, click *New*, enter *Iksha* for the label and name, grant access using hierarchies, select the relevant users, and add administrators.

Public Group 2

- **Steps:** Follow the steps from *Activity 1* to create two more public groups for other users.

The screenshot shows the Salesforce Setup page with the 'Users' section selected. The left sidebar contains a search bar with 'users' entered and a list of navigation items: Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, Feature Settings, Data.com, and Prospector Users. The main content area is titled 'All Users' and includes a help link. Below the title, there is a description of the page's functionality and a 'Let's Go' link. A 'View:' dropdown is set to 'All Users', with links for 'Edit' and 'Create New View'. A alphabetical navigation bar is present above the user list table. The table has columns for Action, Full Name, Alias, Username, Role, Active, and Profile. It lists several users, including 'Chatter Expert', 'Iksha Foundation', 'NSS, NSS', 'SAI VAMSI, MOLLI', 'Street Cause, Street Cause', 'User, Integration', and 'User, Security'. Each user entry includes an 'Edit' link and a checkmark in the 'Active' column. At the bottom of the table, there are buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users'.

Action	Full Name	Alias	Username	Role	Active	Profile
Edit	Chatter Expert	Chatter	chatty.00dns000004dms2ag.aszbthcv5ofi@chatter.salesforce.com		✓	Chatter Free User
Edit	Iksha Foundation, Iksha Foundation	iksh	v21131a05c4@gvpce.ac.in		✓	NGOs Profile
Edit	NSS, NSS	nnss	n21131a05c4@gvpce.ac.in		✓	NGOs Profile
Edit	SAI VAMSI, MOLLI	MSAI	vamsi21131a05c4@gvpce.ac.in		✓	System Administrator
Edit	Street Cause, Street Cause	sstre	s21131a05c4@gvpce.ac.in		✓	NGOs Profile
Edit	User, Integration	integ	integration@00dns000004dms2ag.com		✓	Analytics Cloud Integration User
Edit	User, Security	sec	insightssecurity@00dns000004dms2ag.com		✓	Analytics Cloud Security User

Creating Custom Report Types

Report Type Creation

- **Steps:** Navigate to the *setup page*, search for *Report Types*, click *New Custom Report Type*, choose *Venues* as the primary object, name the type *Venue with DropOff with Volunteer*, describe it, save it to the *Other Reports* category, and set the deployment status to *Deployed*.
- **Additional Steps:** Click *NextLink* to other objects, such as *Drop-Off Points*. Select records that may or may not have related records.

The screenshot shows the Salesforce Setup interface. On the left is a navigation menu with options like 'Users', 'Permission Set Groups', 'Profiles', 'Public Groups', 'Queues', 'Roles', 'User Management Settings', 'Feature Settings', and 'Data.com'. The main content area is titled 'Users' and displays the details for a user named 'Iksha Foundation Iksha_Foundation'. The user's email is '21131a05c4@gvpce.ac.in' and their username is 'v21131a05c4@gvpce.ac.in'. The user is active and has the role of 'Marketing User'. The 'User Detail' section includes fields for Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Address, Time Zone, Locale, Language, Delegated Approver, Manager, Receive Approval Request Emails, Federation ID, App Registration: One-Time Password Authenticator, App Registration: Salesforce Authenticator, Security Key (U2F or WebAuthn), Lightning Login, Temporary Verification Code, and various settings like 'High-Contrast Palette on Charts', 'Load Lightning Pages While Scrolling', 'Salesforce CRM Content User', 'Receive Salesforce CRM Content Email Alerts', 'Receive Salesforce CRM Content Alerts as Daily Digest', 'Make Setup My Default Landing Page', 'Allow Forecasting', 'No MRU Updates', and 'Call Center'.

Creating a Report on Venue with Drop-Off and Volunteer

Instructions

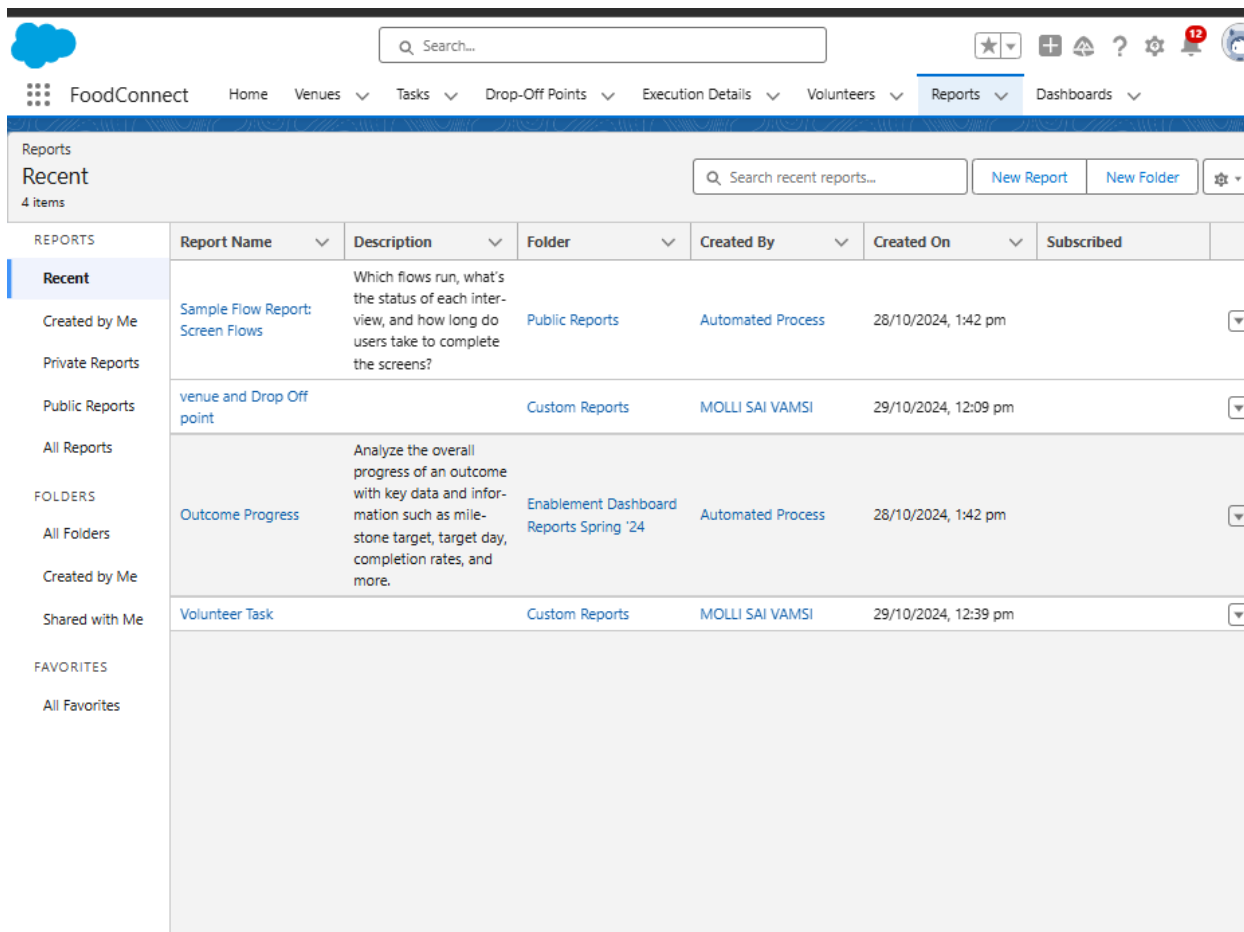

This document describes how to create a report showing volunteer information, venue details, and distances.

- **Access the app:** Go to the *FoodConnect* app and click on the reports tab.
- **Create a folder:** Click on *New Folder*, name it *Custom Reports*, and save it.
- **Open a new report:** Open the *Custom Reports* folder and click on *New Report*.
- **Select report type:** Choose *Venue with DropOff with Volunteer* as the report type.
- **Start the report:** Click on *Start Report*.

- **Add fields:** Add *Volunteer Name*, *Venue Name*, *Drop-Off point Name*, and *Distance* to the report.

Report Details

- **Data display:** The report displays data in a table format.
- **Grouping:** Volunteer names are grouped together.
- **Calculations:** Subtotals and totals of distances are present.

The screenshot shows the FoodConnect interface with the 'Reports' tab selected. A sidebar on the left lists navigation options: Home, Venues, Tasks, Drop-Off Points, Execution Details, Volunteers, Reports, and Dashboards. The 'Reports' section is expanded, showing a 'Recent' filter and a search bar. Below this is a table of reports.

REPORTS	Report Name	Description	Folder	Created By	Created On	Subscribed
Recent						
Created by Me	Sample Flow Report: Screen Flows	Which flows run, what's the status of each interview, and how long do users take to complete the screens?	Public Reports	Automated Process	28/10/2024, 1:42 pm	<input type="checkbox"/>
Private Reports						
Public Reports	venue and Drop Off point		Custom Reports	MOLLI SAI VAMSI	29/10/2024, 12:09 pm	<input type="checkbox"/>
All Reports						
FOLDERS

Saving the Report

- **Save and run:** Click on *Save & Run*.
- **Label:** Give a label to the report.
- **Name:** Name the report *venue and Drop Off point*.
- **Unique Name:** The *Unique Name* will be automatically populated.
- **Save:** Click *Select Folder*, choose *Custom Report*, and click *Save*.

The screenshot shows the FoodConnect application interface. At the top, there is a search bar and navigation icons. The main navigation bar includes links to Home, Venues, Tasks, Drop-Off Points, Execution Details, Volunteers, Reports, and Dashboards. The 'Reports' tab is selected, and a report titled 'venue and Drop Off point' is being viewed. The report is filtered by 'Venue with DropOff with Volunteer'. The report preview shows a message: 'No records returned in preview. Try running the report or editing report filters.' The left sidebar contains a 'Groups' section with 'GROUP ROWS' and 'GROUP COLUMNS' sections. The 'Columns' section lists 'Venue Name', 'Drop-Off Point Name', and 'Venue Location'.

Creating a Volunteer Report

Generating the Report

- Open the *FoodConnect* app.
- Navigate to the *reports* tab.
- Select *Custom Reports*.
- Choose the *Volunteers with Execution Details and Tasks* report type.
- Start the report.
- Group the rows by *Volunteer ID*.
- Add columns for: *Volunteer Name* *Task Name* *Execution Detail* *Owner Name* *Task Date* *Task Rating*

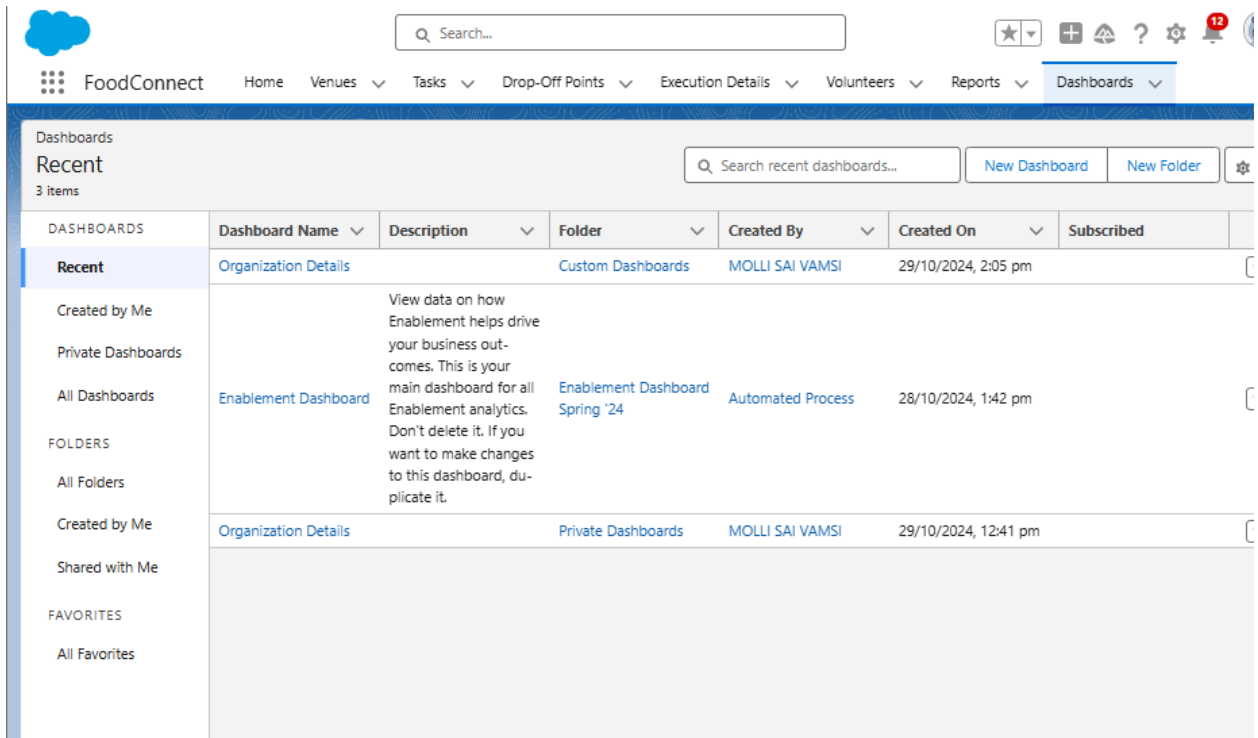

Saving the Report

- Click *Save & Run*.
- Label the report as *Volunteer Task*.
- The *Unique Name* will be automatically populated.
- Select the *Custom Report* folder and click *Save*.

Adding a Dashboard Report

Creating the Dashboard Report

- Open the *FoodConnect* app.
- Navigate to the *Dashboards* tab.
- Create a new folder.
- Label the folder *Custom Dashboards*.
- The *Unique Name* will be automatically populated.

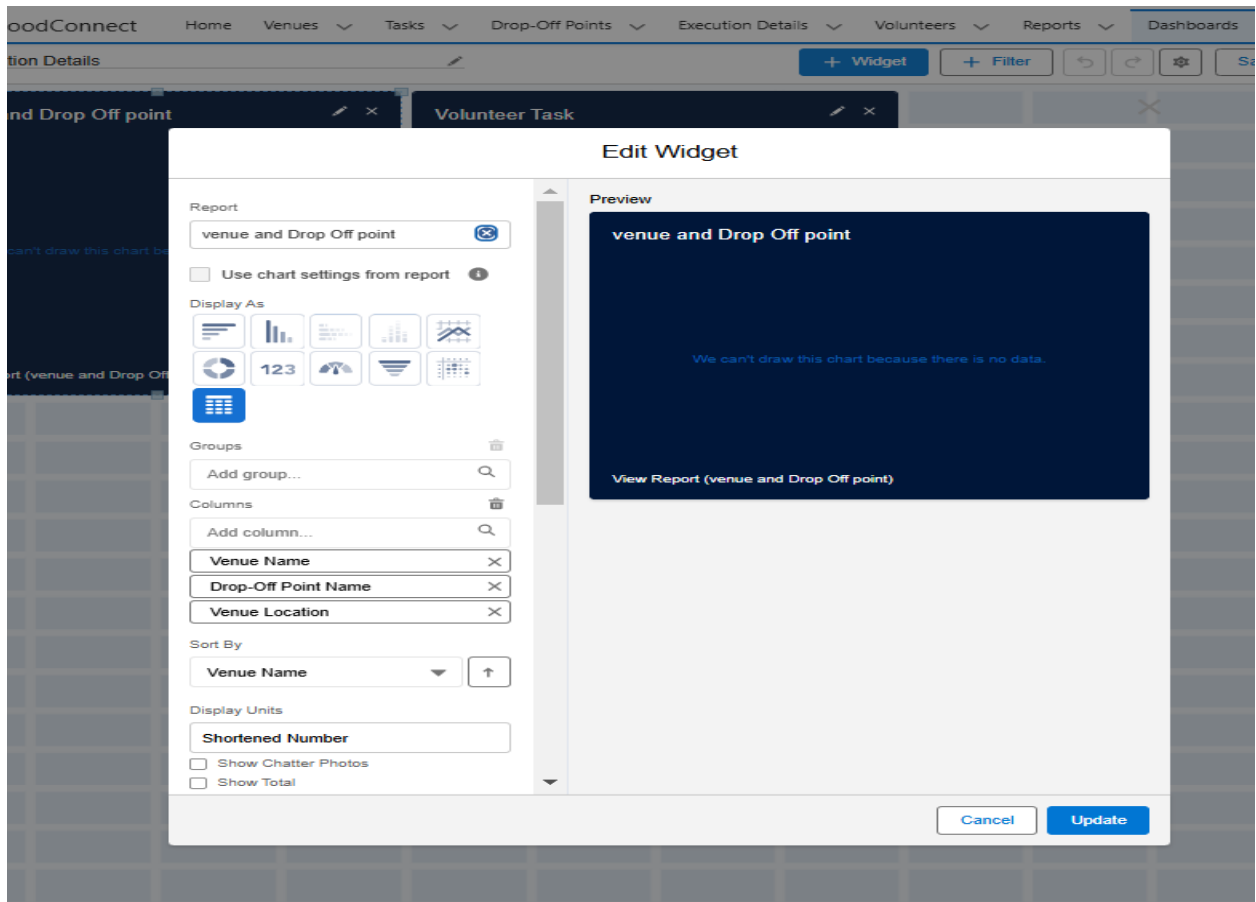

The screenshot shows the FoodConnect app interface. At the top, there's a navigation bar with the FoodConnect logo, a search bar, and various icons. Below the navigation bar, the 'Dashboards' tab is selected. The main content area displays a list of recent dashboards. The table has columns for Dashboard Name, Description, Folder, Created By, Created On, and Subscribed. The first dashboard is 'Organization Details' in the 'Custom Dashboards' folder, created by 'MOLLI SAI VAMSI' on '29/10/2024, 2:05 pm'. The second dashboard is 'Enablement Dashboard' in the 'Enablement Dashboard Spring '24' folder, created by 'Automated Process' on '28/10/2024, 1:42 pm'. The third dashboard is 'Organization Details' in the 'Private Dashboards' folder, created by 'MOLLI SAI VAMSI' on '29/10/2024, 12:41 pm'.

DASHBOARDS	Dashboard Name	Description	Folder	Created By	Created On	Subscribed

Adding a Venue and Drop-Off Point Report

- **Open** a custom dashboard and select *New Dashboard*.
- **Name** the report *Organization Details*.
- **Select** a chart or table in the *Widget*.
- **Choose** the *venue and Drop Off point* report from the *Select Report* menu.
- **Select** the desired options in the *Add Component* section.

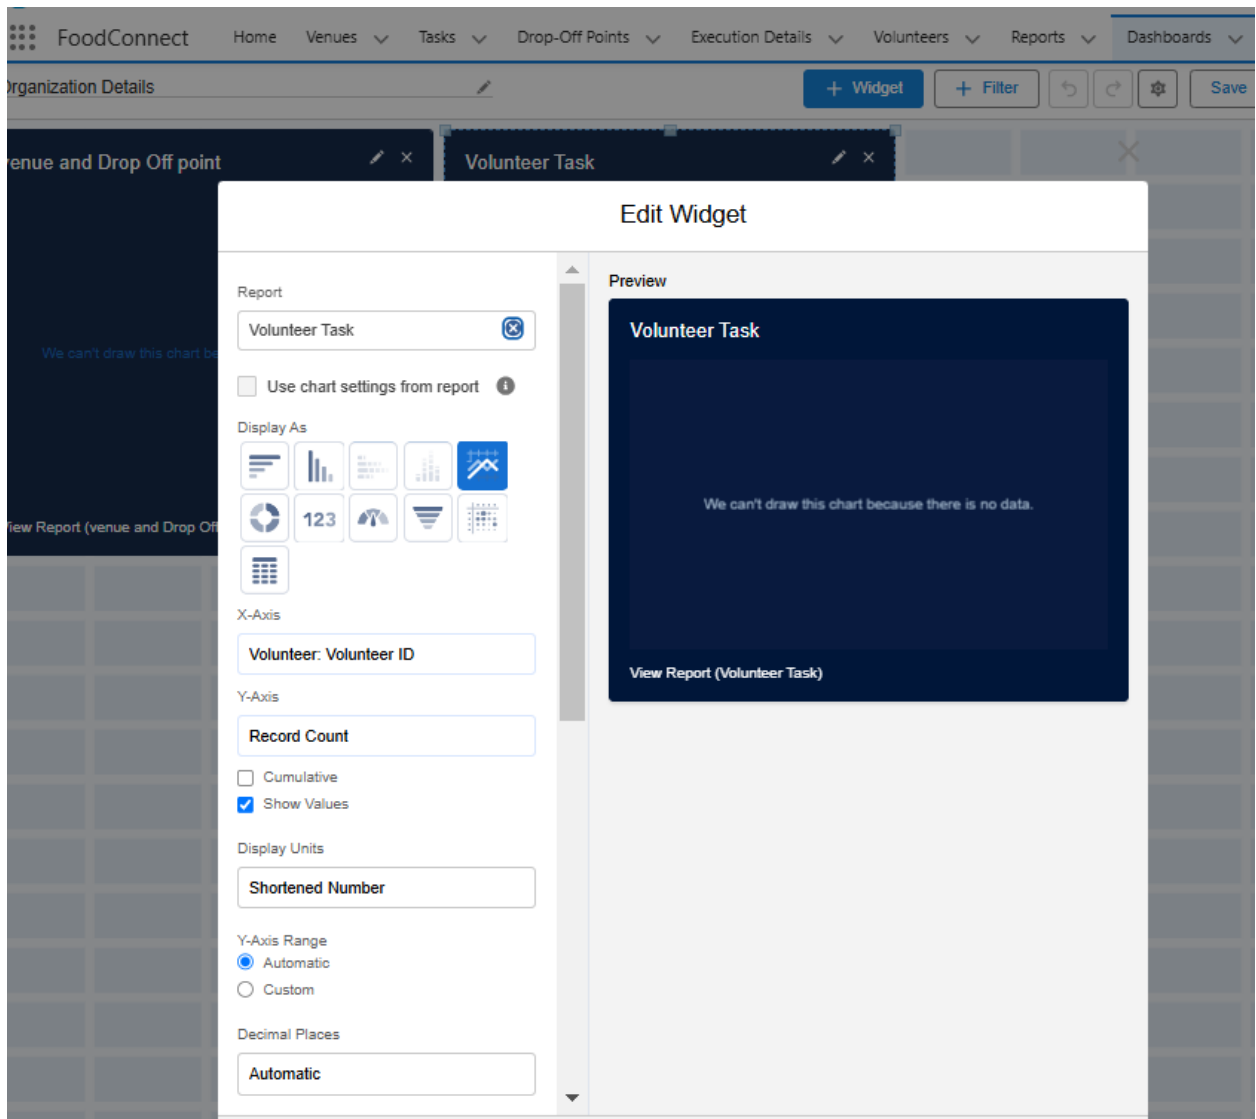

Adding a Volunteer Task Report

- **Click** on a *Widget* and select *Chart or Table*.
- **Select** the *Volunteer Task Report* from the *Select Report* menu.
- **Select** the desired options in the *Add Component* section.
- **Display** the report as a *Line Chart* and choose a *Dark* theme (optional).

Saving the Report

- **Clicksave** to save the report to the dashboard.

Adding a Picture to the Dashboard

Instructions

This document describes how to add an image to a dashboard.

- **Important:** The image must be downloaded first.

Steps

- **Step 1:** Click on *Widget* and *Image*.
- **Step 2:** Click on *Browse Files* to select the image.
- **Step 3:** Choose the image and click *Save As*.**Name:***Task Execution Details*
- **Step 4:** Click on *Select Folder*, choose *Custom Dashboards*, and click *Save*.

Sharing Settings Instructions

Creating Drop-Off Point Sharing Rules

This document outlines steps for creating sharing rules based on distance for Drop-Off points.

- **Instructions:**Navigate to *Sharing Settings*.Locate *Drop-Off point Sharing Rules*.Create a new rule.Define the rule's name and type.Specify criteria for selecting records to share.The criteria uses *distance* as the field.Filtering options include *less than*, *greater than*, and *less than or equal to*.Examples include distances less than 15, greater than 15, or less than or equal to 30 or 50.Select users and groups to share with.Examples include *Iksha* and *NSS* and *Street Cause*.Click *Save* after each rule creation.

Rule Name	Distance Criteria	Shared With
Rule 1	Less than 15	Iksha
Rule 2	Greater than 15, Less than or equal to 30	NSS
Rule 3	Greater than 30, Less than or equal to 50	Street Cause

Creating a Home Page in Lightning App Builder

Steps for Creation

- Go to *setup*, search for "Lightning App Builder", and click "New".
- Select "Home Page" and label it "HOME Page".
- Choose a "Standard Home Page".
- Locate "Flow" and "Drag and Drop" components in the right-hand section.
- Place "Flow: Venue Flow" on the right.
- Add a "Dashboard" component to the first section.
- Click "Save and Activation," then "App Default," and "Add Assignments".
- Add the "FoodConnect App" and save.

FoodConnect Task Execution Details

Summary of Data

- **Date and Time:** 29-Oct-2024, 9:55 am
- **Data Type:** Information on venues and drop-off points.
- **Task Details:** Shows the current status of venue and drop-off point tasks.

Venue and Drop-Off Points

- **La Royale Banquet Hall (Shapur):** 5.116
- **La Royale Banquet Hall (Jeedimetla):** 6.903
- **Paradise Garden (Suraram Village):** 28.23

The screenshot displays the FoodConnect dashboard interface. At the top, there is a navigation bar with the FoodConnect logo, a search bar, and several utility icons. Below the navigation bar, the main content area is divided into sections. On the left, there is a 'Dashboard' section titled 'Organization Details' with a subtitle 'As of 29-Oct-2024, 4:49 pm-Viewing as MOLLI SAI VAMS!' and buttons for 'Open', 'Refresh', and 'Subscribe'. Below this, there are two cards: 'venue and Drop Off point' and 'Volunteer Task', both showing a message 'We can't draw this chart because there is no data.' and a 'View Report' link. On the right, there is a 'Venue Form' section with input fields for 'Venue Name', 'Email' (pre-filled with 'you@example.com'), 'Phone', 'Venue Location', 'Latitude', and 'Longitude'. A 'Next' button is located at the bottom right of the form.

Volunteer Task

- **Record Count:** Shows a *graph* depicting the number of volunteer tasks.
- **Volunteer ID:** Identifies the volunteer.

Venue Form

- **Purpose:** A form for entering venue details.
- **Fields:** Includes venue name, email, phone, and location.
- **Action:** Allows users to fill in the form and proceed to the next step.
